## BEACON – Visibility, alerts, and intelligence for aviation asset monitoring

Geofence your aircraft and associated engines globally using ADS-B technology.

Monitor your aircraft portfolio across jurisdictions worldwide.

Set custom restrictions including airspace, airports, and date ranges.

Receive alerts for unexpected AOG events, squawks, and relevant NOTAMs.

Track fleet utilization targets and operational performance.

Access detailed flight information, mapping, and comprehensive event logs.

Optional API access and CSV downloads available for advanced workflows.

Login today to explore the feature and lock in early pricing of \$160/mo for the entire team and portfolio of aircraft. Questions? Reach out to [info@aviator.aero](mailto:info@aviator.aero)
